DETAILED ACTION

1. The disclosure is objected to because of the following informalities: the instant specification uses figure labels that are not found in the figures, e.g. fig 4 and fig 6. There is no fig 4 or fig 6. There is a fig 4a and fig 6a. Applicant is advised to review all the figures labels in the instant specification. It is suggested that Applicant review the amendment filed 8/31/01 during the prosecution of instant parent application 09/269507.

Appropriate correction is required.

2. The disclosure is objected to because of the following informalities: the continuation data found at the beginning of the instant specification must be updated.

Appropriate correction is required.

3. It should be mentioned that lines 11-12 of instant claim 1 (marked-up copy) are not found in the clean copy. For the sake of expediting prosecution, the following rejections have been based upon the marked-up copy of the claims. Applicant is required to amend claim 1 to include the missing lines. It is suggested that applicant compare the clean and mark-up copies.

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

Art Unit: 1732

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claim 6 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 5 of prior U.S. Patent No. 6303066. This is a double patenting rejection.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1,2,3,4,5,7, 8,9, 10, 11, and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,3,4,5,6,7,8,9,10, and 11 of U.S. Patent No. 6303066. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is well-known in the molding art to move mold halves between open and closed positions by moving the mold halves along two axes. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to move the mold halves of USPN 6303066 along one axis that is parallel to an extension plane through the mold halves and a second axis that is a perpendicular to the extension plane.
